Integration

Want to slash your data entry time by up to 80% TODAY?

Read on to find out how!

Did you know that there's a way to key customer details up to five times faster than you do now?

A way to increase data entry speed while actually increasing accuracy?

Did you know there's a way to do this and more, AND it's available to you completely RISK FREE?

For years organisations from all industries have been using the incredible software solution POSTman Enterprise to boost their productivity, customer service, and professionalism - with amazing results. Organisations such as Lifeline, Brisbane and Logan City Councils are already reaping the benefits of this powerful tool.

POSTman Enterprise with Rapid will:

- Reduce operator key strokes by up to 80%
- Eliminate the costs associated with returned or 'dead' mail
- Eradicate the disastrous effects of poor spelling or indecipherable handwriting
- Intuitively find addresses from minimal information
- Allow you to obtain generous postage discounts by barcoding your mail

**POSTman Enterprise with Rapid
will truly save you money
in RECORD time!**

POSTman uses sophisticated techniques to think like a human so that you can focus on more important things - like getting the most from your customers.

I know what you might be thinking - these are pretty heady claims. **How exactly is all this possible?**

POSTman Enterprise validates addresses at the point of entry by using Australia Post's address file. With over 11 million valid addresses, this ensures that your mail is delivered to the right person, at the right time, every time!

Even more amazingly, average address searches can be completed in as few as 10 keystrokes thanks to POSTman Enterprise's reverse entry technique.

Starting with either a postcode or suburb name and the first letters of a street name, POSTman Enterprise will suggest a list of deliverable addresses. Your operators need only select the appropriate match and it will be automatically pasted into your selected data application.

They will never enter an invalid address again!

But not only can this sophisticated tool decrease operator fatigue and improve productivity, it is also simple to use and easy to implement.

Operators from all backgrounds and levels of training will be amazed by the intuitive entry screen and how simple it is to operate.

POSTman Enterprise can be configured to work with multiple applications and is completely stand alone. It is user customisable with no programming knowledge required! (ActiveX components are included for the more technically minded)

So stop wasting valuable time and money on inaccurate data and exorbitant mail out costs!

With a proven reputation for sensational software and outstanding support, POSTman Enterprise is an excellent solution for any organisation.

If you're looking to **reduce costs**, improve **productivity** and ensure data **accuracy** you need look no further.
